SUMAN K S

Backend Developer | PHP / Laravel | Java / Spring Boot

Bengaluru, India | +91-7996049769 | sumanks1307@gmail.com

PROFESSIONAL SUMMARY

Backend Developer with 5+ years of experience designing and scaling Laravel and PHP applications, REST APIs, and MySQL-based systems. Experienced in PHP, Laravel, Java 17, and Spring Boot, with hands-on ownership of payment, order, and customer workflow modules. Skilled in query optimization, Redis caching, secure third-party integrations, and production support. Known for diagnosing issues quickly and mentoring junior developers on maintainable, clean-code practices.

TECHNICAL SKILLS

Languages: PHP 8.x, Java 17, JavaScript, SQL

Frameworks: Laravel, Lumen, Core PHP, Spring Boot, Spring MVC, Spring Security

Backend: REST APIs, API Integration, JSON, MVC, OOP, Microservices, Authentication, Authorization, JWT

Data & Performance: MySQL, Eloquent ORM, Hibernate/JPA, Redis, Schema Design, Indexing, Query Tuning, N+1 Query Optimization

Cloud: AWS S3, AWS EC2, AWS RDS

Tools & Practices: Git, GitHub, GitLab, Composer, Maven, Postman, Jira, Agile/Scrum, SDLC, Code Review, Production Support

PROFESSIONAL EXPERIENCE

Software Developer
Aug 2023 - Present

Swipewire Technologies Pvt Ltd — Chennai, India

- Build and maintain Laravel backend services and REST APIs across product, order, payment, and customer workflow modules, supporting 50+ active endpoints in production.
- Improved API and database performance by tuning MySQL queries and indexes and eliminating N+1 Eloquent queries, cutting average response time by 40-50% on key endpoints.
- Implemented Redis caching for high-traffic data, reducing repeated database calls by 40-50% and improving backend response consistency under load.
- Integrated payment gateways, SMS APIs, and email services with robust validation, authentication, authorization, and error handling, following secure coding practices.
- Diagnosed and resolved production issues across API routes, query logic, caching, and product data, supporting stable releases and ongoing maintenance.
- Developed reusable service-layer logic following MVC and clean-code practices; tested APIs in Postman and led Git-based code reviews.
- Built controller-service-repository layers using Java 17 and Spring Boot, including Spring MVC, Spring Security, JWT, and Hibernate/JPA, as part of backend modernization.
- Mentored 3-5 junior developers on debugging methodology and maintainable code, while collaborating with frontend, QA, and product teams in Agile delivery.

PHP Developer
Apr 2021 - Jul 2023

SocialBytes Technologies Pvt Ltd — Bengaluru, India

- Developed and maintained Core PHP and Laravel applications, REST APIs, and reusable backend modules to translate business requirements into working systems.
- Designed normalized MySQL schemas and improved data retrieval speed by 40-50% through query tuning, indexing, and schema-level optimizations.
- Implemented authentication, authorization, and server-side validation across application modules, embedding secure coding practices into everyday development.
- Integrated backend APIs with frontend applications and owned API testing, debugging, and defect resolution through to production support.
- Managed the full development lifecycle - requirement analysis, implementation, testing, deployment, and release support - in close coordination with QA and stakeholders.

EDUCATION

Bachelor of Engineering in Information Science and Engineering
2020

Sambhram Institute of Technology, Bengaluru | Visvesvaraya Technological University
